

# OUR PLATFORM IS **RESHAPING** SMART BUILDING AUTOMATION

MORE THAN JUST AN ENERGY MANAGEMENT SYSTEM.  
It's a diverse ecosystem of intelligent control systems,  
IOT Gateways and wireless technologies.

## Smart Alarms

The WiFi-enabled alarms will instantly notify when triggered. The WiFi alarms will raise sirens upon smoke and water leakage, preventing an unfortunate incident.

## Smart Bulbs & Sockets

The smart bulb gives you the freedom to remotely access the lighting. Moreover, the smart sockets provide wonderful flexibility to connect and access any device connected through it.

## Smart Parking System

Our Smart Parking system is made up of sensors and devices that are integrated into smart building platform. Displays available and occupied parking space.

# Benefits

- End to End Security.
- Greater Utility savings
- Improved occupant's wellbeing.
- 360 dashboard management
- Automated alerts
- Seamless connectivity to existing infrastructure.

## Smart & Sustainable Occupancy

Real time/historical information on water & energy consumptions, surveillance records, occupancy levels of rooms.

## Multipurpose Dashboard

The Dynamic multipurpose dashboard delivers visual real time information from each device and manage its operations.

Vodafone Occupancy System enables users to monitor and interact with connected devices for more informed decision making.

Water And Energy Metering

## Integrated Utility & Smart Control Systems that reduce both capital and operational expenses

Energy consumption reduced to

**75%**

Water consumption reduced to

**25%**

Integratable to smart bulbs, smart plugs, indoor temperature sensors, water leakage sensors, smart alarms, AI bots and Artificial assistants

## Industry Specific Use Cases

Public Buildings

Private Buildings
