POWERED BY HYPERNET

Waste Management

Part of the Hypernet IOT platform, Internet of Waste Management helps you manage your Fleets & Waste Bins.

With the help of sensors & gateways, we provide you a platform for real-time monitoring, waste collection management & an analytical engine to help you increase operational efficiency & reduce OPEX by curbing penalties incurred via generating timely alerts, recommending best pickup routes, automating everyday operations & more.

Waste Management
POWERED BY HYPERNET

Product Advantages

- Business **Insights**
- Cost **Optimization**
- Increased **Efficiencies**
- Fleet & Driver **Management**
- Automatic Job **Assignment**
- Improved **Accountibility**
- Route **Optimization**

Product Features

| Pickup Route Recommendation | Automatic Job Assignment | Bin Level & Weight Sensors | Territory Assignment | Real Time Monitoring & Alert |

We simply deliver "Cognitive automation" for you to "do more with less"
